

April XX, 2012

Dear Provider:

Univita Health, Inc. (Univita), has recently entered into a partnership with Magnolia Health Plan, Inc. (Magnolia) to develop its home care network, effective August 1, 2012 to provide home care services to MississippiCan members. In turn, we are now building a provider network in Mississippi and have some exciting opportunities for you.

Univita is a "Home Benefit Management" company that specializes in the provision of Home Health Nursing, Durable Medical Equipment (DME), and Home Infusion Services. In addition to our agreement with Magnolia, Univita contracts with many health plans in the Medicare, Medicaid, and Commercial lines of business to provide management services related to Home Care. Currently contracted with over 700 entities and covering over 1.6 million lives throughout the Southeast, we work in partnership with providers and organizations like yours to provide quality, cost effective Home Care services to patients and members associated with our Health Plan clients.

As a result our agreement with Magnolia to serve as its Home Care network for its Mississippi members, we are expanding our service area into Mississippi. Univita is rapidly building a Home Health, DME and Home Infusion Pharmacy provider network to meet the growing need of Home Care services, and is scheduled to begin managing services for Magnolia effective August 1, 2012.

Some of the benefits to joining our well-established network include:

- Contracting with Univita will allow you to continue seeing the members you are currently servicing for Magnolia, as well as potentially increasing your referral activity as the health plan grows in membership.
- Univita also supplies you with a complete referral, which includes physician's orders and authorization for payment.
- As a licensed and certified provider in the Univita network, you service the member in your area of expertise, send your bill to Univita, and you receive reimbursement in a timely manner.

I am confident that you will benefit from participating with us as we work to provide outstanding service and benefits to Medicaid beneficiaries who are Magnolia members. I also encourage you to visit our website: [www.univitahealth.com](http://www.univitahealth.com) for more information about Univita.

If you have an interest in exploring the possibility of joining our network, we'll be glad to expedite the process by having you provide the information requested on the next page and faxing it to 952-983-5265 at your earliest opportunity. After we receive your fax, personnel from our network development team will be reaching out to you shortly to begin the network process. If we do not hear from you in the near future, our network development team will still be reaching out to you to discuss options around becoming a part of the Univita network.

Sincerely,

Mike Grabko  
Senior Vice President, Expansion and Networks  
Univita Health, Inc.
